“I’d like to add my thanks to everyone involved both from OES and the City. Dave and his team were first-rate and we appreciate the professionalism and efficiency with which they went about doing the installation work. Thanks also to Jason and the city staff for accommodating all that was needed to allow this installation to occur in the middle of the hospital bed setup. Dana, despite the strange times we are living, all of you came together to make this project a reality and did so on-time and on-budget. The citizens of the Sault and the fans of the Soo Greyhounds are the true beneficiaries and I can’t wait for the opportunity for them to experience the new videoboard at our first game of the season.”
