OES was asked to help obtain and install a new system in about 4 months, while working around small windows in the facility because of show schedules. They not only accomplished the deadline, they took the extra time to talk to us and figure out what we actually needed based on how we were going to use the boards. They helped introduce us to a completely different system, than what we were looking at, and it was the best decision for us. We are looking forward to the flexibility of the boards based the different events in the arena.
