"Our OES scoreboard system is a vital component of our game day experience. The LED screens allow us to integrate partners and fan-engaging activations throughout our in-game experience in exciting and entertaining ways. Beyond Sting games, our OES system has been used to add to the experience of several minor hockey games, graduation ceremonies, and community events. We frequently receive compliments regarding the clarity of the screens and the impact that they have on the atmosphere."

Daniel McAuley
Manager, Marketing & Sting Experience
