"OES was awarded this project as they were a local supplier that offered a quality product at a great price. We found during installation and commissioning that they were very professional and efficient. We had a very tight timeline to complete the work before opening to the public and OES met the deadline without any issues. Since launching we have found that OES is excellent at responding to calls for training and operational support and the screen continues to perform very well."

Andrew Barnhardt
Director, IT Operations & Broadcast
